

*Erratum***Response functions for the inversion  
of data from unresolved solar magnetic elements****L.R. Bellot Rubio, B. Ruiz Cobo, and M. Collados**

Instituto de Astrofísica de Canarias, E-38200 La Laguna (Tenerife), Spain

Astron. Astrophys. **306**, 960–972 (1996)

Fig. 2 of this paper was not printed. Figure and caption are as follows:

**Fig. 2.** Analytical (solid line) and numerical (dashed line) RF to the magnetic temperature for the continuum of Stokes  $I$  computed at  $\lambda = 6302.25 \text{ \AA}$  and multiplied by the internal temperature. They have been normalized to the HSRA continuum and to the area of the resolution element
