Astron. Astrophys. **325**, L17–L20 (1997)

In the original figure the left hand panel was printed twice. The correct figure is given below.

Fig. 2. An absorption feature and a soft excess are clearly evident in the LECS residuals when a power law ($\Gamma = 1.57$, $N_H = N_H^{Gal}$) is fitted the the data (*left panel*). Data are well parameterized by a broken power-law plus a notch (*right panel*)
