Astron. Astrophys. **327**, 231–239 (1997)

Our Eq. (7) was misquoted from Warner (1995). The correct formula is

$$R_1/R_\odot = 0.016(1 - M_1/M_{\text{Ch}})^{3/5}$$

which yields $R_1 = 0.0073(19)R_\odot$. Within the errors this gives the same result as Eq. (8), and is thus in perfect agreement with Fig. 1 of Hamada & Salpeter (1961).

Acknowledgements. We are grateful to Brian Warner for pointing out the mistake.

* Walter Wargau passed away in 1996.
